METHODOLOGY

The ASI Ad Impressions Study was first launched in 2006 by ASI’s research team to give our members powerful data that proves what we already know – that ADVERTISING SPECIALTIES are one of the most high-impact, cost-effective advertising mediums around.

Thousands of in-person and online interviews have been conducted with businesspeople and students in key cities around North America, Canada, Europe and Australia. These interviews have been used to gauge the reach of these products, consumers’ perceptions of promotional products, their influence on buying decisions and their influence on the perception of the advertiser.

METHODOLOGY: This year’s report updates the prior years’ reports by greatly expanding the geographic reach of the study across the United States. Using online surveys, we have conducted this year’s research with over 100,000 consumers across the United States. Consumers from every state in the United States are represented and for the first time we have expanded beyond just the major cities into suburban and rural America. By employing this new methodology, we are able to provide even more pointed, specific results that show that value of promotional products across the U.S.

Results from prior ASI Ad Impressions studies have been incorporated into this report to allow for a greater depth of analysis and statistics that you can use with your clients to show the value of promotional products.
Section One

PRODUCT POPULARITY

U.S. consumers were asked which promotional products they currently owned. Promotional items were defined as items that include pens, T-shirts, drinkware, calendars or any items that have an advertiser’s logo on them. They are usually given away free by companies to consumers.

As the graphic below reveals, T-shirts are the item that is most often owned by promotional product recipients in the U.S., followed by drinkware, writing instruments and outerwear. In fact, all promotional products have strong ownership, with one-quarter or more of recipients owning each.

PRODUCTS OWNED in the UNITED STATES

- Polo Shirts: 33%
- T-Shirts: 58%
- Bags: 50%
- USB Drives: 45%
- Drinkware: 53%
- Outerwear: 50%
- Caps & Headwear: 41%
- Desk Accessories: 41%
- Calendars: 29%
- Performance Wear: 27%
- Health & Safety: 30%
- Power Banks: 26%
- Writing Instruments: 50%
- Umbrellas: 25%

PRODUCT POPULARITY OUTSIDE of the U.S.

For this section, respondents were asked to rate up to three promotional items they had received in the last 12 months. Promotional items were defined as items that include pens, T-shirts, mugs, calendars or any items that have a logo or message from an advertiser on them; they are usually given away for free to consumers in hopes of positively influencing their purchasing preferences or their attitudes toward the advertiser.

Promotional Products Don’t Fade Away

Respondents were asked how long they keep a typical type of promotional item. Across all promotional products, the average was just over seven months. Some products, such as calendars, can stay around for about a year, while others, especially health and safety products and writing instruments, last for about six months. Calendars, which have the longest staying power, are the one item used most often for reference purposes, such as referring to a name or phone number.

PROMO PRODUCTS ARE PASSED ALONG

Consumers who receive ad specialty products will typically give them to someone else when they are finished with them, thus furthering the advertiser’s reach. In the U.S. and Canada, nearly two-thirds of ad specialties that are not wanted are given away. In fact, in most countries, more than half of consumers report that they will give away a product that they are finished with rather than throw it out or file it away.

Promotional products are passed along when recipients are finished with them, except for those in Mexico, where they are much more likely to be thrown away.

- 64% of 35-44 give away a promo item
- 57% of <35 give away a promo item

Percent of consumers who give away a promo item they’re finished with.
Usefulness is Key

Consumers want products that are, first and foremost, useful to them, especially when it comes to the more practical items such as writing instruments and USB drives. Here, usefulness outweighs attractiveness by at least five to one. However, that’s not to say that attractiveness isn’t important, especially if the item needs to be worn. For outerwear, attractiveness is a very close second to usefulness in reasons for keeping the product, with more than half of those who own outerwear reporting they keep it because it is attractive. If you want a customer to use the product for reference, then calendars are the way to go. Apparel items, whether they be shirts, outerwear or hats, are cited as the most enjoyable to have.

What happens when you ask 2,000 people the following: “When you receive a promotional product, how do you feel about the company that gave it to you?”
For this section, the average number of impressions each promotional product receives was calculated. The number of impressions a product makes was derived from multiplying how long a recipient has the product to how many people they come in contact with each month while using it.

In the U.S., bags continue to generate the most impressions (5,772) of any item measured in the study. This is because bags are used often in public places where they can be seen by many people. Other items that deliver a large number of impressions are writing instruments, hats, outerwear and shirts.

The accompanying charts illustrate the top five products, by country, that deliver the most impressions:

**The Most Impressions in the U.S.**

- Bags: 5,772 impressions
- Writing instruments: 3,136 impressions
- Outerwear: 2,805 impressions
- Shirts: 2,650 impressions
- Hats: 2,450 impressions

*In the U.S., bags generate the most impressions by far.*

**The Most Impressions in Canada**

- Bags: 4,724 impressions
- Writing instruments: 3,634 impressions
- Outerwear: 2,943 impressions
- Shirts: 2,805 impressions
- Hats: 2,253 impressions

*In Canada, bags also generate the most impressions.*

**The Most Impressions in Mexico**

- Apparel: 2,882 impressions
- Writing instruments: 2,498 impressions
- Outerwear: 2,208 impressions
- Shirts: 1,633 impressions
- Hats: 1,630 impressions

*Apparel generates the most impressions in Mexico.*
While the exact ranking of impressions changes somewhat from location to location, the overall list of products generating the most impressions is consistent. Wearables consistently deliver a high number of impressions, and in the U.S., bags deliver the most impressions every year.

Items that create the fewest impressions tend to be those intended mostly for one person, such as health and safety items and USB drives. The value of these items is more in the connection they make with the user than the total number of impressions generated.

### The Most Impressions in London

- **Promotional Outerwear**: 5,125 Impressions
- **Bags**: 4,066 Impressions
- **Writing Instruments**: 3,449 Impressions
- **T-shirts**: 1,852 Impressions

Though the incidence of owning promotional outerwear items is low, they generate the most impressions.

### The Most Impressions in Paris

- **Promotional Outerwear**: 3,473 Impressions
- **Bags**: 2,665 Impressions
- **Writing Instruments**: 2,372 Impressions
- **T-shirts**: 1,700 Impressions

Similar to London, the incidence of owning promotional outerwear is low, but a high number of impressions are generated.

### The Most Impressions in Berlin

- **Writing Instruments**: 5,615 Impressions
- **Bags**: 2,774 Impressions
- **Promotional Outerwear**: 2,380 Impressions
- **T-shirts**: 1,843 Impressions

In Berlin, writing instruments generate the most impressions by far.
Distributors should work with clients to determine the goals of their campaigns and the connection they want to establish with the intended recipient before selecting the right vehicle to deliver their message. Taking into account the number and quality of the impressions generated, in addition to some of the demographic considerations shown earlier in the report, gives the distributor the opportunity to serve as a consultant rather than an order taker.

### The Most Impressions in Madrid

- **Writing Instruments**: 3,729 Impressions
- **Hoodies**: 2,505 Impressions
- **November**: 2,260 Impressions
- **T-Shirts**: 1,344 Impressions

*In the Madrid, writing instruments generate the most impressions.*

### The Most Impressions in Rome

- **Writing Instruments**: 2,125 Impressions
- **Hoodies**: 1,966 Impressions
- **November**: 1,447 Impressions
- **T-Shirts**: 1,421 Impressions

*In Rome, writing instruments also generate the most impressions by far.*

### The Most Impressions in Sydney

- **Writing Instruments**: 3,233 Impressions
- **Hoodies**: 3,179 Impressions
- **T-Shirts**: 2,034 Impressions
- **Bags**: 1,755 Impressions

*In Sydney, bags generate the most impressions.*
AD SPECIALTIES ARE COST-EFFECTIVE

Advertising specialties remain less expensive per impression than most other forms of advertising.
The investment in ad specialties is modest, more targeted and allows for much greater levels of interaction with consumers than other forms of advertising.

As the chart on this page illustrates, promotional products have a lower cost per impression in the United States than prime-time television advertising, national magazine advertising and newspaper ads, and a similar CPI to radio and Internet advertising. Plus, while all of these other forms of advertising are often passive, advertising specialties allow for much more active interaction, such as storing valuable information on a USB drive or carrying groceries or other items around town in a promotional bag.

Also, consider that when consumers receive advertising specialties, they are often the exact market segment the advertiser is trying to reach. Banks aren’t simply mailing out pens to consumers of all ages from all areas, whether or not they have a branch there. Rather, they are giving out the pens only to current or prospective customers in the geographic areas that they serve. This targeted approach to advertising is much more difficult, if not impossible, to achieve in other forms of mass market advertising.

More good news: The cost for advertising specialties is not expected to increase markedly in the next few years, making them a more stable, reliable and innovative way for advertisers to reach consumers.

Even more good news: Consider that the cost of producing a 30-second radio or television commercial is often out of reach for all but the biggest advertisers. Many would have their entire advertising budget eaten up before they even aired the commercial more than a few times. This isn’t true with advertising specialties. Companies from the smallest local businesses to the largest Fortune 100 companies have access to the best that the advertising specialty business has to offer.
When asked what types of advertising they like best, consumers under 55 prefer PROMOTIONAL PRODUCTS.

Recall is highest for apparel items, as 85% recall the advertiser that gave them a shirt or hat.

PROMOTIONAL PRODUCTS are the most highly regarded form of advertising.

Deciding between PROMOTIONAL PRODUCTS or Internet advertising?

85% remember the advertiser worldwide. Recall is highest for apparel items, as 85% recall the advertiser that gave them a shirt or hat.

Consider this.... Consumers are nearly 2.5x more likely to have a positive opinion of promotional products compared to Internet advertising.
